Tools & Practices: Git, Docker, Linux, JUnit, REST APIs, Agile / SDLC, Design Patterns, Systems Analysis & Design

Soft Skills: Problem Solving, Attention to Detail, Written & Oral Communication, Teamwork, Adaptability

EXPERIENCE

Administrator

Jun 2021 - Feb 2022

KiddyChef • Dnipro, Ukraine

Ran daily front-of-house operations for a children's entertainment venue: order management and payments through the Poster POS system, basic bookkeeping, and coordinating staff during shifts.

Remote Assistant

Feb 2022 - Present

KiddyChef • Remote

Continued supporting the team remotely on an on-call basis: troubleshooting the Poster POS system and training new staff on the processes I used to run.

Line Cook

2023 - Present

The Keg Steakhouse + Bar • Ottawa, ON

Manage food prep and service in a high-volume commercial kitchen under strict quality, consistency, and timing standards.

PROJECTS

Order & Inventory Management Platform

2026 - Present

Personal Project • Java 17 / Spring Boot / Oracle

- Modular monolith backend (API, Application, Domain, Infrastructure layers) for B2B order and inventory management.
- Transactional order processing with inventory stock reservation; JWT-based auth with role-based access control.
- Oracle persistence with Flyway migrations, containerized with Docker; tested with JUnit 5, Mockito, and a dedicated Oracle test schema.

Study Spot Finder

2026

Academic Project • Node.js / Express / MongoDB

Group web app for discovering and rating study spots on an interactive map, with filters for outlets, Wi-Fi, hours, and A/C; built with session-based authentication, role-based access control, and user-submitted listings.

Telegram Media Downloader

2023

Personal Project • Python / Telethon

CLI tool to bulk-download media from Telegram channels and chats, with filtering by type, date range, and message offset, plus resumable/skip-existing downloads.

Portfolio Website

2026

Personal Project • HTML / CSS / JavaScript

Designed and built a fully responsive personal portfolio site from scratch with vanilla HTML, CSS, and JavaScript, no frameworks.
