

DMYTRO DEHTIAROV

Software Development Co-op Candidate · Second-Year Computer Programming Student, Algonquin College

Ottawa, ON, Canada · +1 (613) 600-8353 · deht0001@algonquinlive.com · github.com/dmytro-dehtiarov
linkedin.com/in/dmytro-dehtiarov · dmytro-dehtiarov.com

Second-year Computer Programming student at Algonquin College, currently in Level 3 of 4, building and testing Java / Spring Boot backends and JavaScript web applications. Automated test coverage with JUnit and Mockito, CI/CD pipelines with GitHub Actions and Docker, and relational and document databases across the web, application server, and database tiers. Git and Linux daily. Three-plus years in a fast-paced, team-based hospitality environment before moving into software.

PROJECTS

Order & Inventory Platform

2026 - Present

Personal Project · Java / Spring Boot / Oracle / Docker / GitHub Actions

- Built a production-style order and inventory backend on a modular monolith architecture, with Oracle persistence via Flyway and JPA and REST endpoints.
- Wrote JUnit and Mockito unit and integration tests, including a concurrency test that proves a pessimistic-lock fix for a race condition in stock reservation.
- Set up a GitHub Actions CI/CD pipeline that gates integration tests behind manual approval, so an external contributor's pull request cannot run them against a live database.

Study Spot Finder

2026

Academic Project · Node.js / Express / MongoDB / Pug

- Led a 3-person team through the SDLC using GitHub Projects: owned the architecture and feature decisions, distributed and reviewed issues.
- Drove backend and view-layer implementation for a map-based, full-stack web application.

Debt Tracker (AI-Agent-Directed Development)

2026

Personal Project · Next.js / TypeScript / Prisma / Vitest · Built with Claude Code (MCP)

- Directed an AI coding agent (Claude Code, via MCP tool integrations) overnight to design and build a deployed single-user app for tracking invoices and payments.
- Defined requirements and scope, reviewed the agent's output, and validated it with a Vitest suite covering business logic and API route handlers against a real database rather than mocks.

Portfolio Website

2026

Academic Project · HTML / CSS / JavaScript

- Responsive personal portfolio site built with vanilla HTML, CSS, and JavaScript.

EDUCATION

Computer Programming Diploma (Co-op)

2026 - Present (Expected Feb 2028)

Algonquin College, Ottawa, ON · Level 3 of 4 (Year 2, year-round study) · GPA 3.9 · Dean's Honour List

Key coursework: Object-Oriented Programming (Java), Database Systems, Design Patterns, Systems Analysis & Design, Enterprise Application Programming, Web Programming, Network Programming (TCP/IP, socket programming, multi-threading - Fall 2026).

Bachelor's Degree, Marketing (Incomplete, 1 year completed)

2021 - 2022

Alfred Nobel University, Dnipro, Ukraine

PROGRAM-RELATED SKILLS

Languages: Java, JavaScript, Python, SQL

Frameworks: Spring Boot, Node.js, Express

Tools & Practices: Git, Linux, Docker, Gradle, GitHub Actions (CI/CD), JUnit / Mockito, REST APIs, Agile / SDLC

Databases: Oracle, PostgreSQL, MongoDB, MySQL, SQL Server

CERTIFICATIONS & TRAINING

Spring Certified Professional (in progress) *Spring Academy, 2026*

Practical React *SoftServe Academy, 2023*

Frontend Development *SoftServe IT Academy, 2022*

EXPERIENCE

Line Cook

2023 - Present

The Keg Steakhouse + Bar · Ottawa, ON

- Manage food prep and service in a high-volume commercial kitchen under strict quality, consistency, and timing standards.

Remote Assistant

Feb 2022 - Present

KiddyChef · Remote · On-call

- Support the team on an on-call basis: troubleshooting the Poster POS system and training new staff on the processes I used to run.

Administrator

Jun 2021 - Feb 2022

KiddyChef · Dnipro, Ukraine

- Ran daily front-of-house operations for a children's entertainment venue: order management and payments through the Poster POS system, basic bookkeeping, and coordinating staff during shifts.
